Åbningstider

Opening hours Open throughout the year and round the clock.

Gøttrup Fiskepark is one of Denmark's largest and loveliest put & take angling parks. In a large area of more than 100,000 m² there lies a big lake, surrounded by lovely countryside with areas of woodland, meadowland and ravines where you can always find shelter from the wind and the rain. Thousands of rainbow, river and brook trout have been put out in the lake. In addition, there are pike, zander and eel. Trout from 0.8-10 kg are put out. Around the lake there are tables and benches as well as huts providing shelter. There is also a service building, toilet and outdoor fish-cleaning facility.
